

ABSTRACT OF THE DISCLOSURE

A method and system are provided for allowing a user to manage captured images automatically. The method includes establishing a connection between a computing device and an image capturing device and defining a set of rules pertaining to an image using the computing device. The method additionally includes transferring captured images from the image capturing device to the computing device. The set of rules governs actions performed after acquisition of each image. In order to manage the captured images, the receiving computing device interprets the associated rules. The method additionally includes managing the captured image in accordance with the associated image rule. The system includes the tools necessary to execute the aforementioned method.
